Tier 4	40000+	132801	\$0.00825	\$1,095.61
Total Gallons		172801	Total Cost	\$1204.81

Special Message

11 Potential Leak: The date your meter was read it indicated that a potential leak may exist. Please review the backside of this statement for more information.

Water consumption is billed in arrears. Water and Sewer flat rates are billed in advance.

Payment needs to be received in the office no later than **DECEMBER 31, 2013** to avoid late fees. Payments received after **NOVEMBER 21, 2013** are not reflected on this billing.

As a reminder, our Auto-Debit Program is available to all of our customers. Just give Debbie a call at 530/580-6277, email her at dsjaarda@tcpud.org or see our website to receive more

Key to Understanding your Tahoe City Public Utility District Bill:

1. Previous Meter Reading

This number represents the previous months meter read taken at your property.

2. Current Meter Reading

This number represents the most recent meter reading taken at your property.

3. Water Consumption this Month

This number represents the total number of gallons used at your property this past month. (Current meter reading minus previous meter read.)

4. "Base" Water Charge

This is the flat fee you pay each month for water service at your property. This charge covers infrastructure replacement and operating costs that exist year-round, whether your home is occupied or not, so that you have water service available, and fire protection throughout the year.

5. Water Consumption Charge

This is the fee you pay based on your actual water consumption for the month. TCPUD has structured its rates to encourage conservation.

6. Total Water Charge

This is your total monthly water cost and reflects your base rate plus your water consumption charge.

7. Calculation of Monthly Water Usage

There are 4 tiers in the water consumption rates and they are structured to encourage conservation. Tier 1, up to 8,000 gallons, per month, provides sufficient domestic water use for a household of four.

8. Sewer Charge

This is the flat fee you pay each month for sewer service at your property. (Did you know it only costs you \$.01 per gallon to transport your sewage to the state-of-the-art treatment plant in Truckee?)

9. Total Amount Due

This fee reflects your monthly water charges AND your monthly sewer charges combined and any past due charges.

10. Water Use History

This chart shows your water usage by month for the 13 months. (Note the significant increase in water consumption displayed in the month of November. This could be an indication of a problem and TCPUD would add a potential leak notice on your bill as explained below.)

11. Potential Water Leak Notice

If you have a red box on the front of your statement, this is a potential water leak notice. This is a notification that when we read your meter, water did not stop running for one continuous hour in the previous 24 hours. This may be an indication that a potential leak exists. Refer to the backside of your bill for a detailed explanation of the potential leak sources and what to do and visit www.tahoecitypud.com for more information.
